

L2 CHINESE INPUT:

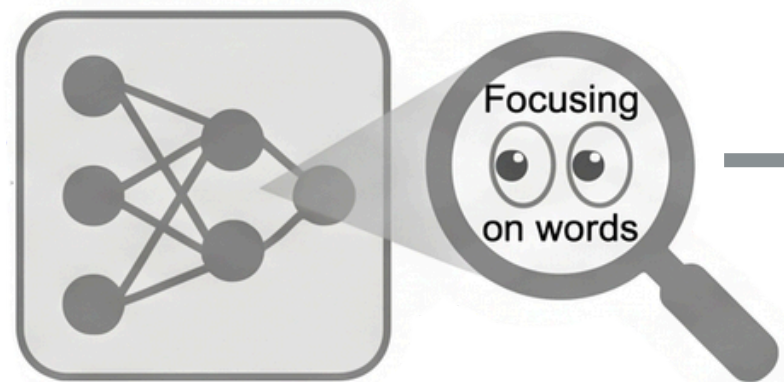

Context:

那个苹果坏了，我... (That apple went bad, I...)

Target completions:

- ✅ BA Sentence (preferred):
把它扔了。 (...threw it away.)
- ⚠️ SVO Sentence (non-preferred):
扔了它。 (...threw it away.)

Approach 1: Traditional CGEC (MacBERT)

Limited sensitivity to discourse context

OUTPUT:
MOST NON-PREFERRED SENTENCES ACCEPTED

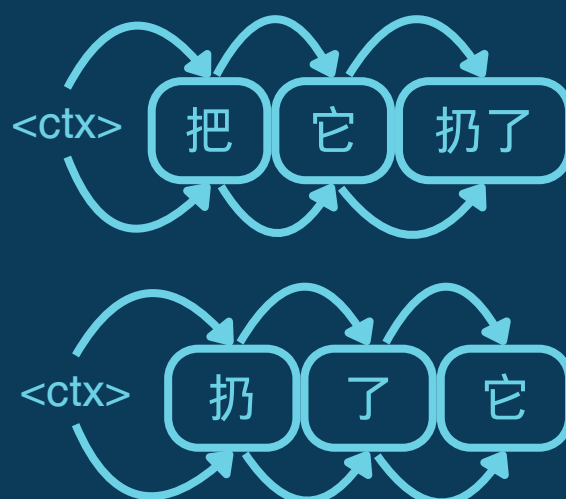

Ba Sentence: Accepted ✅
SVO Sentence: Accepted ✅

Infel. Miss (97.0%)
Pair Acc. (1.00%)

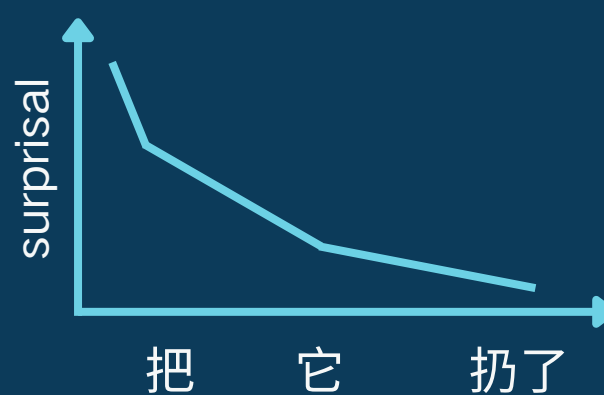

😞 Misses contextually infelicitous continuations

Approach 2: LLM Surprisal (Qwen / Llama / Yi / GLM / InternLM / Mistral / Pythia)

CONTEXTUAL FACILITATION

SENTENCE vs FIRST-TOKEN

First-token Avg Acc: 57.5%
Sentence-level Avg Acc: 87.93%

OUTPUT:
LOWER-SURPRISAL PREFERENCE

Ba Sentence: Low Surprisal (2.54) ✅
SVO Sentence: High Surprisal (4.60) ❌

- LLMs MEAN ACCURACY (87.93%)
- BEST MODEL (93.50%)

😊 Tracks discourse-conditioned preferences
